Installation continued

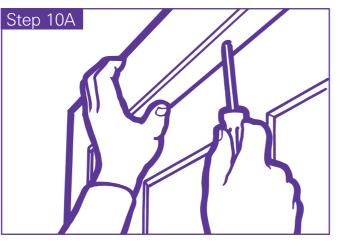

Step 7. Cut the 2 glide guide strips to suit the door width. Tack both strips to the bottom of the door using 5 panel pins with each glide guide strip.

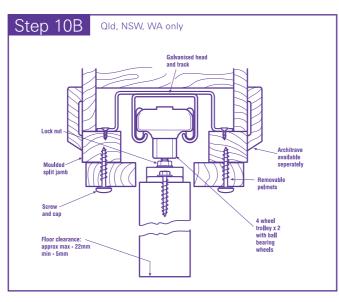

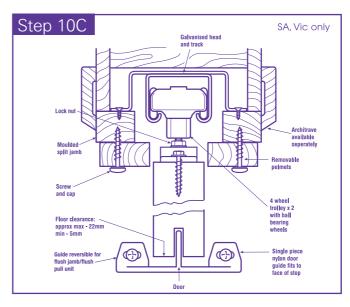

Step 8. With the door in the cavity opening, lift the door to locate each door support bracket onto the carriage assembly bolt.

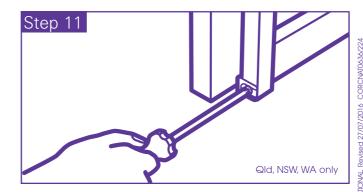

Step 9. Use the spanner provided to raise and level the door to the required height and to plumb against the closing jamb. Do not discard the spanner. Attach it to the spanner clip for future use.

Step 10A. Screw in place the removable fillet using 4 x 35mm screws through a white snap cap base. Finish off with supplied snap caps. Refer to Steps 10A, 10B and 10C.

Step 11. Fix the two nylon finger guides to the base of the frame using the elongated opening (for subsequent adjustment). The flexible portion protrudes into the cavity. When the guides are positioned correctly, fasten with a 15mm round head fixing screw.

Installing your new Slimline 3000 QuickFix

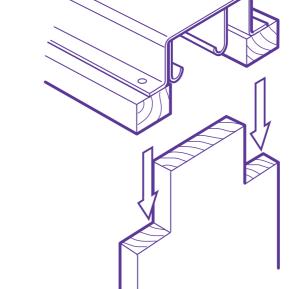

pocket using the 6 x 12mm countersunk screws. Do not remove

Vic, SA, WA only

Step 2

Step 2. Screw/nail the closing jamb to the head section, fixing through head timber into closing jamb stile.

x Vic, SA, WA only + WA, NSW, Qld only

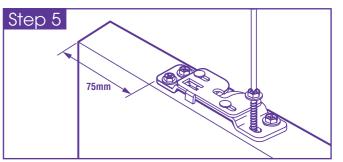

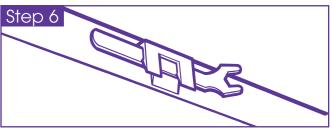

Step 3. Place the assembled unit in position in the opening. Plumb and fasten to the brick/stud.

Fasten the base to the floor using the concrete nail provided. NSW, Qld only. Fasten the head track assembly to the top of the opening using the 1 x 19mm pan head screw.

Step 4. Place both carriage assemblies in the track.

Step 5. Attach the 2 x door brackets to the top of the door using the 8 x 30mm hex head screws, 75mm in from each side and central to the thickness of the door. Ensure both door support brackets are facing in the same direction.

Step 6. Attach the spanner storage clip to the top of the door using the 1 x 15mm countersunk screw.
